Introduction to the Bruna dels Pirineus Beef Association

Visit to an important farm in the area The herds producing 'Ternera de los Pirineos Catalanes' or 'Vedella dels Pirineus Catalans' (Beef from the Catalan Pyrenees) basically comes from the Bruna Pyrenean breed, native to the area, resulting from a cross between the old native cow from the Catalan Pyrenean counties and the Alpine Brown breed. However, crosses with Charolaise and Limousine are allowed. It is a breed intended for beef production and with excellent milk production for rearing calves. They are a very rural breed, hardy in the fields. Their food is based on grazing, complemented by hay or forage at certain periods. The beasts are slaughtered at between 9 and 12 months for females and 10 and 15 months for males. The resulting product is a meat with tones ranging from pinkish to bright red, infiltrated with intramuscular fat. It is a high-quality, very tender and juicy meat.

07h30 Buffet Breakfast

09h00 Departure for Navàs.

Les Navàs is one of the Catalan districts with the longest tradition in the production of olive oil. The extraordinary quality of this oil is the result of different factors: painstaking cultivation techniques, the climatic conditions of the area, with frequent mist and low rainfall, the use of varieties, the fact that the olives are picked directly from the tree using a system referred to as pentinat, and a completely cold production process.

10h00 We will visit an olive farm, where they will explain the different olive harvesting systems. We will continue with the visit to the olive oil production mill, emphasizing the production process and the machinery used for it.

11h30 Olive oil tasting

15h00 Visit to the facilities that Group Casacuberta has in the Parc d'Activitats Econòmiques d'Osona. After visiting all the dealer's facilities, explanation of the two solutions that currently exist in tractors to reduce particle emissions and comply with the European TIER 4A regulations: the SCR system of selective catalytic reduction, a system that uses urea, and the system CEGR for cooled exhaust gas recirculation. Then you can see the two systems on two tractors.

This Visit will allow reviewing topics of mechanics and maintenance of the tractor.
